SUPPLEMENTARY INFORMATION: Regulation 29 CFR 1910.217(h) regulates the use of Presence Sensing Devices (PSDs) in mechanical power-press safety systems. A PSD (e.g., a photoelectric field or curtain) automatically stops the stroke of a mechanical power press when the device detects an operator entering a danger zone near the press. The PSD initiation standard contains a number of information collection requirements, including: certifying brake monitor adjustments, alternatives to photoelectric PSDs, safety system design and installation, and worker training; annual recertification of safety systems; establishing and maintaining the original certification and validation records, as well as the most recent recertification and revalidation records; affixing labels to test rods and to certified and recertified presses; and notifying an OSHA-recognized third-party validation organization when a safety system component fails, the employer modifies the safety system, or a point-of-operation injury occurs. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 26, 2023 (88 FR 34188).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs

receive a month-to-month extension while they undergo review.

The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

3. *Type of submission*: Extension.

4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: Applications for new licenses and amendments may be submitted at any time (on occasion). Applications for renewal are submitted every 15 years. Reports are submitted as events occur.

6. *Who will be required or asked to respond*: Applicants for and holders of specific licenses authorizing the use of licensed radioactive material for radiography.

7. *The estimated number of annual responses*: 2,938.

8. *The estimated number of annual respondents*: 548.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 243,547.12 (3,814 reporting + 217,977.52 recordkeeping + 21,755.60 third party disclosure).

10. *Abstract*: 10 CFR part 34, establishes radiation safety requirements for the use of radioactive material in industrial radiography. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected, and that licensee possession and use of source and byproduct material is in compliance with license and regulatory requirements.
