Natural gas companies must also send a copy of submitted reports to each state commission for the state(s) in which the reported service interruption occurred. information collection as follows. Please note that the cost figures in the Table for FERC–576 has been rounded (columns 4) for display purposes only. The calculations for the ‘cost per response’ are based on the number of hours multiplied by the total weight hourly cost.

Federal Energy Regulatory Commission

[Docket No. CP19–502–001]

Commonwealth LNG, LLC; Notice of Application for Amendment and Establishing Intervention Deadline

Take notice that on July 8, 2021, Commonwealth LNG, LLC (Commonwealth), One Riverway, Suite 500, Houston, TX 77056, filed an application under section 3(a) of the Natural Gas Act (NGA) requesting an amendment to its August 20, 2019 application (2019 Application) requesting authorization from the Commission to site, construct, and operate a natural gas liquefaction and export facility (LNG Facility), including an NGA Section 3 natural gas pipeline in Cameron Parish, Louisiana. Commonwealth’s LNG Facility,

described in its 2019 Application included six 40,000 cubic meter full containment LNG Storage Tanks designed with an inner and outer tank fabricated from nine percent (9%) nickel steel which would have required a special authorization from the Department of Transportation, Pipeline and Hazardous Material Safety Administration (PHMSA).

Commonwealth now plans to change the design of the LNG Storage Tanks to a traditional full-containment, modular-built, tank design with a nine percent (9%) nickel inner tank and a concrete outer tank with carbon steel liner which would not require a special authorization from the PHMSA. Commonwealth also proposes to increase the net capacity of the six LNG Storage Tanks from 40,000 to 50,000 cubic meters each (60,000 cubic meters total), for a new total working storage volume of 300,000 for the LNG Facility.

Pursuant to Section 157.9 of the Commission’s Rules of Practice and Procedure,¹ within 90 days of this Notice the Commission staff will either: Complete its environmental review and place it into the Commission’s public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of

⁵ Costs (for wages and benefits) are based on wage figures from the Bureau of Labor Statistics (BLS) at http://bls.gov/oes/current/naics3_221000.htm, as of June 2021. In the 60-day notice, the costs incorrectly reflected 2020 figures rather than the actual 2021 cost estimates. The corrected costs are listed above and does not impact the renewal notice for FERC–567. Commission staff estimates that 20%

of the work is performed by a manager, and 80% is performed by legal staff. The hourly costs for wages plus benefits are:

- Management (Occupational Code: 11–0000) is \$97.89.
- Legal (Occupational Code: 23–0000) is \$142.25.

Therefore, the weighted hourly cost (for wages plus benefits) is \$133.38 [(0.20 * \$97.89) + (0.80 * \$142.25)].

⁶ The total number of respondents in the currently approved OMB inventory for FERC–576 is 147. Changes to the estimate were based on average number of respondents over the past three years.

Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.
