The Federal operating permits issued by EPA to the facilities identified above incorporate all applicable air quality requirements and require monitoring to ensure compliance with these requirements. Submittal of periodic reports of all required monitoring, as well as submittal of an annual compliance certification, are also required. The Federal operating permits have a term not to exceed five years, and a timely application for permit renewal must be submitted to EPA prior to permit expiration in order to continue operation of the permitted source.

The provisions of 40 CFR part 71 govern issuance of these permits. EPA published a notice and opportunity to comment in a newspaper of general circulation in the area of the facility for each permit issued. The EPA received public comments on the Transwestern Pipeline Company; El Paso Natural Gas Company; El Paso Field Services; and William Field Services, Los Mestenios Compressor Station permits. In accordance with the requirements of 40

CFR 71.11(j), EPA responded to all comments received on these permits. The EPA received no comments on the permit for William Field Services, Ojito. Pursuant to 40 CFR 71.11(i), EPA provided copies of the final permits to the applicant and each person who submitted written comments on a permit or requested notice of the final permit decision. No one requested review of any of the final permits by the Environmental Appeals Board within 30 days of receipt of the final permits in accordance with 40 CFR 71.11(l). Thus, pursuant to 40 CFR 71.11(i) and (l), the permits became final on the dates indicated in the chart above. A petition to the Environmental Appeals Board under 40 CFR 71.11(l) is, under 42 U.S.C. 307(b), a prerequisite to seeking judicial review of the final agency action. See 40 CFR 71.11(l)(4).

40 CFR 71.11(l)(7) requires notice of any final agency action regarding a Federal operating permit to be published in the **Federal Register**. This notice satisfies that requirement.

Dated: July 21, 2004.
