

at the Mojave Airport per day. These military aircraft can produce sonic booms. Even in the worst case scenario, *i.e.*, one launch from the Mojave Airport, one launch of the proposed Unmanned Lifting Entry Vehicle from Edwards AFB, and two jet aircraft take offs or landings from the Mojave Airport, there would not be more than 10 sonic booms generated per day in the region of influence. Therefore, there would be no significant cumulative impacts to noise from the proposed action.

No significant cumulative impacts to biological, cultural, land use, socioeconomics, environmental justice, transportation, geologic, mineral, visual and aesthetic, or water resources would occur as a result of the proposed action. No significant cumulative impacts would result from hazardous materials or hazardous waste used or produced as a result of the proposed action.

Detailed analyses of safety and related issues will be addressed in the FAA's Mission and Safety Review prior to issuing a launch license. However, safety and health analyses of operations that have the potential for environmental impact were considered in the EA and were determined to have no significant cumulative impacts on the environment.

Although the proposed action would support and facilitate limited growth, it would not induce growth. Additionally, there would be no specific future development activities currently known that would be dependent on the proposed action. Therefore no secondary impacts are expected to result from the proposed action.

No Action Alternative

Under the no action alternative, the FAA would not issue a launch license to XCOR for up to 35 launches of the Sphinx launch vehicle from the Mojave Airport. XCOR could continue to conduct aviation-related activities that do not require a launch license. The predicted environmental effects of the proposed action would not occur. The existing on- and off-site conditions at the Mojave Airport would remain unchanged.

Determination

An analysis of the proposed action has concluded that there are no significant short-term or long-term effects to the environment or surrounding populations. After careful and thorough consideration of the facts contained herein, the undersigned finds that the proposed Federal action is consistent with existing national environmental policies and objectives as

set forth in Section 101 of NEPA and other applicable environmental requirements and will not significantly affect the quality of the human environment or otherwise include any condition requiring consultation pursuant to Section 102(2)(C) of NEPA.
