**SUPPLEMENTARY INFORMATION:** A notice published in the **Federal Register** on September 2, 2022 (87 FR 54173), requested comments and information from the public about how to update the United States Department of Agriculture (USDA) organic regulations on inert ingredients in pesticides used in organic production. This advance notice of proposed rulemaking (ANPR) established a 60-day comment period, ending November 1, 2022. During this comment period, AMS received requests from two industry organizations asking for additional time to submit comments, citing the complexity of the questions

and topic. Further, one organization notes that this comment period overlaps with two other National Organic Program (NOP) comment periods: Organic Livestock and Poultry Standards (87 FR 48562), closing October 11, 2022, and the National Organic Standards Board Meeting (87 FR 37495), closing September 29, 2022.

AMS is extending the comment period by 60 days to encourage constructive input on the topics raised by the ANPR. The September 2, 2022, ANPR includes numerous specific alternatives and questions for commenter consideration. Included for reference in this docket (AMS–NOP–21–0008) are several documents to aid consideration and evaluation of these questions, including: NOSB recommendations; copies of EPA List 3, List 4A, and List 4B; National List petition procedures; and a 2015 spreadsheet identifying inert ingredients used in organic production (based on a 2011 survey by the Organic Materials Review Institute).

Comments received would inform AMS's approach on this topic regarding the allowance of inert ingredients in organic production. We ask that commenters please fully explain all views and alternative solutions or suggestions and supply examples, data, or other information to support those views. Substantive, well-reasoned, and constructive comments will assist AMS in identifying challenges and evaluating alternatives as we move forward with rulemaking.

##### **II. The Proposed LCRI National Primary Drinking Water Regulation**

Under SDWA, EPA sets public health goals and enforceable standards for drinking water quality. EPA initially addressed lead in drinking water through the original Lead and Copper Rule (LCR), an NPDWR promulgated in 1991 under SDWA. In January 2021, EPA issued the Lead and Copper Rule Revisions (LCRR) and subsequently reviewed those revisions to further evaluate the LCRR's protection of families and communities, particularly those that have been disproportionately impacted by lead in drinking water. In the LCRR Review, EPA identified the following priority areas for improvement: proactive and equitable lead service line replacement, strengthening compliance tap sampling to better identify communities most at risk of lead in drinking water and to compel lead reduction actions, and reducing the complexity of the regulation through improvement of the action and trigger level construct. On December 16, 2021, EPA announced it would propose a rulemaking (the LCRI) to address these improvements. For more information about the LCRR Review and the agency's decision to develop a proposed LCRI NPDWR, see "Review of the National Primary Drinking Water Regulation: Lead and Copper Rule Revisions (LCRR)" (86 FR 71574) (December 17, 2021). EPA intends to propose for public comment a new rule to revise the LCRR to advance the goals described above while balancing stakeholder interests and incorporating required economic, environmental justice, and other analyses. The agency intends to propose

the LCRI in 2023 and take final action by October 16, 2024.

#### Synopsis

1. In this notice of proposed rulemaking (NPRM), the Commission proposes to require mobile wireless providers to block text messages at the network level (*i.e.*, without consumer opt in or opt out) that purport to be from invalid, unallocated, or unused numbers, and numbers on the Do-Not-Originate (DNO) list. These texts are highly likely to be illegal. The Commission seeks comment on this

proposal, including whether these text messages represent a material fraction of unwanted text messages. The Commission seeks comment on whether providers are blocking these types of messages today and, if so, how that blocking may inform the proposal. The Commission seeks comment on additional types of text blocking providers are currently doing, (*e.g.*, blocking based on reasonable analytics). The Commission seeks comment on whether requiring mobile providers to block text messages at the network level is necessary or whether the Commission should simply continue to allow for such network level blocking. The Commission also seeks comment on whether numbers placed on the DNO list are used for illegal texts.

2. Spoofing is where the caller disguises its number and instead shows the number of a neighbor or reputable source in the caller ID field in order to trick the recipient into thinking the call is trustworthy. The Commission seeks comment on the extent to which spoofing is a problem with regard to text messaging. The Commission also seek comment on whether there are additional measures the Commission can take to encourage mobile wireless providers to block texts that appear to come from spoofed numbers.

3. The Commission seeks comment on the need for mandatory blocking. The Commission seeks comment on whether increases in illegal texts may be a result of blocking unwanted calls and if the Commission should bring text blocking more in line with call blocking by requiring blocking from invalid, unallocated, or unused numbers, and numbers that otherwise appear to be spoofed, and therefore reduce the incentive for scammers to migrate to texting.

4. The Commission seeks comment on the voluntary text blocking that providers are currently doing to protect their subscribers. The Commission also seeks comment on the effectiveness of device-level or application-based text blocking to reduce illegal texts and the prevalence of application-based (*i.e.*, over the top, or OTT) text messaging and whether there are more or fewer illegal text messages sent on OTT services as opposed to through mobile wireless providers. The Commission seeks comment on how OTT messages differ in transmission characteristics from SMS and MMS texts, including their relationship to wireless telephone numbers and how likely the proposed regulations will mitigate the problem of illegal texts.

5. The Commission seeks comment on whether the definition of text message
