

(except that UP remained obligated to respond to the Board's subpoena authority); (4) continued to hold these proceedings in abeyance; and (5) directed the Government to file quarterly reports on the progress of future settlement negotiations with the remaining Railroad Defendants.

Movants jointly request that the Board approve the proposed agreement they have negotiated (the BNSF Agreement) to settle these rate reasonableness complaints as between them only and that the requested approval be without prejudice to the Governments' complaints and other actions insofar as they apply to the remaining Railroad Defendants involved in these proceedings. The UP Agreement, according to Movants, served as a model for their Agreement.

The BNSF Agreement, which Movants describe as flexible, comprehensive, long-term, and system-wide:

(1) Provides for a term of 25 years commencing on the effective date of the Board's approval of the BNSF Agreement and continues in effect for additional 5-year periods, subject to a 1-year termination notice requirement;

(2) Applies broadly to the nationwide movement on BNSF's rail lines of irradiated spent fuel, parts, and constituents; spent fuel moving from foreign countries to the United States for disposal; empty casks; radioactive wastes; and buffer and escort cars. Excluded from the BNSF Agreement are local movements originating and terminating in the East, which are covered by the rate basis prescribed in *Trainload Rates on Radioactive Materials, E. Railroads*, 362 I.C.C. 756 (1980) and 364 I.C.C. 981 (1981) (*Eastern Prescription*);<sup>1</sup>

(3) Establishes that the movement of these commodities constitutes common carrier service; addresses the elements of service required of BNSF; adopts guidelines for safe handling and security; obligates BNSF to provide, as needed, "extra services" as described in the BNSF Agreement, at the rates agreed upon;

(4) Adopts a rate methodology to:

(a) apply to all future movements of these radioactive materials in common carrier service. The methodology adopts maximum R/VC markups (not to exceed to 1.80, 2.50, or 3.51 times the shipment

cost, depending on commodity type) of BNSF's most current system-average variable unit costs computed under the Board's Uniform Rail Costing System. Movants state that the proposed rate methodology is consistent with, but broadens, the rate prescription adopted in *Eastern Prescription*; and

(b) compensate BNSF for "extra services" and dedicated train service, when requested by the Government, and procedures to calculate "equitable compensation" for emergency related costs that BNSF may incur.

(5) Adopts a procedure to update rates and "extra services" annually to reflect changes in BNSF's system-average unit costs;

(6) Extinguishes BNSF's liability (and that of its predecessors and subsidiaries) for reparations in all matters arising out of these proceedings; and

(7) Adopts Alternative Dispute Resolution procedures with final recourse to the Board and mechanisms to renegotiate portions of the BNSF Agreement in a limited number of circumstances or if changed circumstances make further adherence to the terms of the BNSF Agreement "grossly inequitable" to either party.

Movants request that the Board: (1) Prescribe the rate methodology and maximum R/VC ratios that have been agreed to for the radioactive materials and rail services that are the subject of the BNSF Agreement; (2) dismiss BNSF as a defendant in these proceedings, preserve the liability of connecting carriers for reparations as to their portion of the charges assessed on through routes that include(d) BNSF, and not require BNSF to participate in rate proceedings initiated by the Government against remaining Railroad Defendants (except that BNSF will remain obligated to respond to the Board's subpoena authority); (3) retain jurisdiction over these proceedings and continue to hold them in abeyance pending further settlement negotiations; and (4) publish notice of their motion and the proposed BNSF Agreement in the **Federal Register** and adopt a procedural schedule for the filing of comments and replies.

The Board is granting Movants' request in part. Notice of their motion and the proposed BNSF Agreement is being published in the **Federal Register** and a procedural schedule is being adopted for the filing of comments and replies responsive to Movant's remaining requests.

Decided: October 10, 2012.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

**Jeffrey Herzig,**  
*Clearance Clerk.*

Collections Records—Treasury/FMS.

**SYSTEM LOCATION:**

Records are located at the FMS, U.S. Department of the Treasury, Liberty Center Building (Headquarters), 401 14th Street SW., Washington, DC 20227. Records are also located throughout the United States at various Federal Reserve Banks and financial institutions, which act as Treasury's fiscal and financial agents. The address(es) of the fiscal and financial agents may be obtained from the system manager below.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Individuals who electronically authorize payments to the Federal government through the use of communication networks, such as the Internet, via means such as Automated Clearing House (ACH), check conversion, credit card, and/or stored value card.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Collections records containing information about individuals who electronically authorize payments to the Federal government to the extent such records are covered by the Privacy Act of 1974. The records may contain identifying information, such as an individual's name(s), taxpayer identifying number (i.e., Social Security Number or employer identification number), home address, home telephone number, and personal email address (home and work); an individual's employer's name, address, telephone number, and email address; an individual's date of birth and driver's license number; information about an individual's bank account(s) and other types of accounts from which payments

are made, such as financial institution routing and account number; credit card numbers; information about an individual's payments made to or from the United States (or to other entities such as private contractors for the Federal government), including the amount, date, status of payments, payment settlement history, and tracking numbers used to locate payment information; user name and password assigned to an individual; other information used to identify and/or authenticate the user of an electronic system to authorize and make payments, such as a unique question and answer chosen by an individual; information concerning the authority of an individual to use an electronic system (access status) and the individual's historical use of the electronic system. The records also may contain information about the governmental agency to which payment is made and information required by such agency as authorized or required by law. The information contained in the records covered by FMS's system of records is necessary to process financial transactions while protecting the government and the public from financial risks that could be associated with electronic transactions. It is noted that the system covers records obtained in connection with various mechanisms that are either used currently or may be used in the future for electronic financial transactions. Not every transaction will require the maintenance of all of the information listed in this section. The categories of records cover the broad spectrum of information that might be connected to various types of transactions.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

5 U.S.C. 301; 31 U.S.C. 321; 31 U.S.C. chapter 33; 31 U.S.C. 3720

**PURPOSE(S):**

The purpose of this system is to maintain records about individuals who electronically authorize payments to the Federal government. The information contained in the records is maintained for the purpose of facilitating the collection and reporting of receipts from the public to the Federal government and to minimize the financial risk to the Government and the public of unauthorized use of electronic payment methods. Examples of payment mechanisms authorized electronically include ACH, check conversion, credit card, or stored value cards. Individuals may authorize payments using paper check conversion or Internet-based systems through programs such as "Pay.gov" and "Electronic Federal

Taxpayer Payment System (EFTPS)."

The information also is maintained to:

(a) Provide collections information to the Federal agency collecting the public receipts;

(b) Authenticate the identity of individuals who electronically authorize payments to the Federal government;

(c) Verify the payment history and eligibility of individuals to electronically authorize payments to the Federal government;

(d) Provide statistical information on collections operations;

(e) Test and develop enhancements to the computer systems that contain the records; and

(f) Collect debts owed to the Federal government from individuals when the debt arises from the unauthorized use of electronic payment methods.

FMS's use of the information contained in the records is necessary to process financial transactions while protecting the government and the public from financial risks that could be associated with electronic transactions. The records are collected and maintained for three primary reasons. First, in order to process a payment electronically, a payor needs to submit his or her name and bank account or credit card account information. Without such information, FMS would not be able to process the payment as requested by the individual authorizing the payment. Second, to authenticate the identity of the person initiating the electronic transaction, FMS may, in some instances, require some or all of the information described in "Categories of records in the system," above, depending upon the level of risk associated with a particular type of transaction. Third, to verify the financial and other information provided by the person initiating the electronic transaction and to evaluate the payor's ability to make the payment authorized, FMS may compare information submitted with information available in FMS's electronic transaction historical database or commercial databases used for verification purposes, much like a store clerk determines whether someone paying by paper check has a history of writing bad checks. The ability to research historical transaction information will help eliminate the risk of fraudulent activity, such as the purchase of government products using an account with insufficient funds or using a stolen identity. By collecting and maintaining a certain amount of unique personal information about an individual who purchases goods from the government, FMS can help ensure

that the individual's sensitive financial information will not be fraudulently accessed or used by anyone other than the individual.

In addition, the information contained in the covered records will be used for collateral purposes related to the processing of financial transactions, such as collection of statistical information on operations, development of computer systems, investigation of unauthorized or fraudulent activity related to electronic transactions, and the collection of debts arising out of such activity.

**ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:**

These records may be used to disclose information to:

(1) Appropriate Federal, state, local or foreign agencies responsible for investigating or prosecuting the violation of, or for enforcing or implementing, a statute, rule, regulation, order, or license, but only if the investigation, prosecution, enforcement or implementation concerns a transaction(s) or other event(s) that involved (or contemplates involvement of), in whole or part, an electronic method of collecting receipts for the Federal government. The records and information may also be disclosed to commercial database vendors to the extent necessary to obtain information pertinent to such an investigation, prosecution, enforcement or implementation;

(2) Commercial database vendors for the purposes of authenticating the identity of individuals who electronically authorize payments to the Federal government, to obtain information on such individuals' payment or check writing history, and for administrative purposes, such as resolving a question about a transaction. For purposes of this notice, the term "commercial database vendors" means vendors who maintain and disclose information from consumer credit, check verification, and address databases;

(3) A court, magistrate, or administrative tribunal, in the course of presenting evidence, including disclosures to opposing counsel or witnesses, for the purpose of civil discovery, litigation, or settlement negotiations or in response to a subpoena, where arguably relevant to the litigation, or in connection with criminal law proceedings;

(4) A congressional office in response to an inquiry made at the request of the individual to whom the record pertains;

(5) Fiscal agents, financial agents, financial institutions, and contractors for the purpose of performing financial management services, including, but not limited to, processing payments, investigating and rectifying possible erroneous reporting information, creating and reviewing statistics to improve the quality of services provided, conducting debt collection services, or developing, testing and enhancing computer systems;

(6) Federal agencies, their agents and contractors for the purposes of facilitating the collection of receipts, determining the acceptable method of collection, the accounting of such receipts, and the implementation of programs related to the receipts being collected;

(7) Federal agencies, their agents and contractors, credit bureaus, and employers of individuals who owe delinquent debt for the purpose of garnishing wages only when the debt arises from the unauthorized use of electronic payment methods. The information will be used for the purpose of collecting such debt through offset, administrative wage garnishment, referral to private collection agencies, litigation, reporting the debt to credit bureaus, or for any other authorized debt collection purpose;

(8) Financial institutions, including banks and credit unions, and credit card companies for the purpose of collections and/or investigating the accuracy of information required to complete transactions using electronic methods and for administrative purposes, such as resolving questions about a transaction; and

(9) Appropriate agencies, entities, and persons when (a) the Department suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (b) the Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Department or another agency or entity) that rely upon the compromised information; and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

Debt information concerning a government claim against a debtor when the debt arises from the unauthorized use of electronic payment methods is also furnished, in accordance with 5 U.S.C. 552a(b)(12) and 31 U.S.C. 3711(e), to consumer reporting agencies, as defined by the Fair Credit Reporting Act, 5 U.S.C. 1681(f), to encourage repayment of a delinquent debt.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:****STORAGE:**

Records in this system are stored electronically in secure facilities in a locked drawer behind a locked door.

**RETRIEVABILITY:**

Records may be retrieved by account number (such as financial institution account number or credit card account number), name (including an authentication credential, e.g., a user name), social security number, transaction identification number, or other alpha/numeric identifying information.

**SAFEGUARDS:**

All officials access the system of records on a need-to-know basis only, as authorized by the system manager after security background checks. Procedural and physical safeguards, such as personal accountability, audit logs, and specialized communications security, are utilized. Accountability and audit logs allow systems managers to track the actions of every user of the system. Each user has an individual password (as opposed to a group password) for which he or she is responsible. Thus, a system manager can identify access to the records by user. Access to computerized records is limited, through use of encryption, access codes, and other internal mechanisms, to those whose official duties require access. Storage facilities are secured by various means such as security guards, locked doors with key entry, and limited virtual access requiring a physical token.

Disposal is not authorized at this time.<sup>4</sup>

FMS must submit the record schedules to NARA. Until NARA approves the updated records schedules, disposal is not authorized.

**Background**

On September 23, 2001, the President issued Executive Order 13224 (the "Order") pursuant to the International Emergency Economic Powers Act, 50 U.S.C. 1701-1706, and the United Nations Participation Act of 1945, 22 U.S.C. 287c. In the Order, the President declared a national emergency to address grave acts of terrorism and threats of terrorism committed by foreign terrorists, including the September 11, 2001 terrorist attacks in New York, Pennsylvania, and at the Pentagon. The Order was further amended by Executive Order 13284 of January 23, 2003, to reflect the creation of the Department of Homeland Security.
