The FCC rules under 47 CFR 2.1033 and 15.121 require manufacturers of scanning receivers to design their equipment so that it has 38 dB of image rejection for Cellular Service frequencies, tuning, control and filtering circuitry are inaccessible and any attempt to modify the scanning receiver to receive Cellular Service transmissions will likely render the scanning receiver inoperable. The Commission's rules also require manufacturers to submit information with any application for certification that describes the testing method used to determine compliance with the 38 dB image rejection ratio, the design features that prevent modification of the scanning receiver to receive Cellular Service transmissions, and the design steps taken to make tuning, control, and filtering circuitry inaccessible. Furthermore, the FCC requires equipment to carry a statement assessing the vulnerability of the scanning receiver to modification and to have a label affixed to the scanning receiver, similar to the following as described in section 15.121:

Warning: Modification of this device to receive cellular radiotelephone service signals is prohibited under FCC Rules and Federal Law.

The Commission uses the information required in this equipment authorization process to determine whether the equipment that is being marketed complies with the Congressional mandate in the Telephone Disclosure and Dispute Resolution Act of 1992 (TDDRA) and applicable Commission rules.
