

than 230 percent of the Federal poverty level of \$10 per inpatient hospital discharge, while hospitals in all other counties are taxed at \$5 per inpatient hospital discharge, would violate this requirement, because the distinction being drawn between tax rate groups is associated with a Medicaid eligibility criterion with a higher tax rate imposed on the tax rate group that is likely to involve more Medicaid taxable units.

(4) *Transition Period.* (i) States with health care-related tax waivers that do not meet the requirements of paragraph (e)(3), where the date of the most recent approval of the waiver that violates paragraph (e)(3) occurred 2 years or less before [EFFECTIVE DATE OF A FINAL RULE], are not eligible for a transition period. Any collections made under that waiver following [EFFECTIVE DATE OF A FINAL RULE] may be subject to deduction from medical assistance expenditures as described in § 433.70(b).

(ii) States with health care-related tax waivers that do not meet the requirements of paragraph (e)(3), where the date of the most recent approval of the waiver that violates paragraph (e)(3) occurred more than two years before prior to [EFFECTIVE DATE OF A FINAL RULE], must either:

(A) Submit a health care-related tax waiver proposal that complies with paragraph (e)(3) with an effective date no later than the start of the first State fiscal year beginning at least one year from [EFFECTIVE DATE OF A FINAL RULE]; or

(B) Otherwise modify the health care-related tax to comply with this rule and all other applicable Federal requirements with an effective date not later than the start of the first State fiscal year beginning at least one year from [EFFECTIVE DATE OF A FINAL RULE].

(iii) Once the transition period for a tax waiver that qualifies under paragraph (e)(4)(ii) has expired, CMS may deduct from a State's medical assistance expenditures revenues from health care-related taxes that do not meet the requirements of paragraph (e)(3) as specified by section 1903(w)(1)(A)(iii) of the Act and § 433.70(b).

#### National Wildlife Refuge System; 2025-2026 Station-Specific Hunting and Sport Fishing Regulations

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Proposed rule.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), propose to open or expand hunting or sport fishing opportunities on 16 National Wildlife Refuge System (NWRS) stations and 1 National Fish Hatchery System (NFHS) station. This includes inaugural hunting opportunities at Southern Maryland Woodlands National Wildlife Refuge (NWR), the newest addition to the NWRS, and the formal opening of hunting opportunities at Grasslands Wildlife Management Area (WMA), as well as inaugural sport fishing at North Attleboro National Fish Hatchery (NFH). These actions will open or expand 42 opportunities for hunting and fishing across more than 87,000 acres of Service lands and waters. In addition, at the request of the State of Minnesota and the White Earth Nation, Tamarac NWR proposes to end an experimental 5-day early teal hunt where the refuge overlaps with Tribal land to ensure safety for wild rice harvesting and to align with State regulations. We also propose to make administrative changes to existing station-specific regulations to improve the clarity and accuracy of regulations, reduce the regulatory burden on the public, and comply with a Presidential mandate for plain-language standards.

**DATES:** We will accept comments received or postmarked on or before June 30, 2025.

*Information collection requirements:* If you wish to comment on the information collection requirements in this proposal, alongside proposed revisions and additions to the Code of Federal Regulations (CFR), please note that the Office of Management and Budget (OMB) is required to make a decision concerning the collection of information contained in this proposal between 30 and 60 days after the date of publication in the **Federal Register**. Therefore, comments should be submitted to the Service Information Collection Clearance Officer, U.S. Fish

and Wildlife Service, (see “*Information collection requirements*” below under **ADDRESSES**) by July 15, 2025.

#### SUPPLEMENTARY INFORMATION:

##### Background

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee), as amended (Administration Act), closes NWRs in all States except Alaska to all uses until opened. The Secretary of the Interior (Secretary) may open refuge areas to any use, including hunting and/or sport

fishing, upon a determination that the use is compatible with the purposes of the refuge and National Wildlife Refuge System (Refuge System) mission. The action also must be in accordance with provisions of all laws applicable to the areas, developed in coordination with the appropriate State fish and wildlife agency(ies), consistent with the principles of sound fish and wildlife management and administration, and otherwise in the public interest. These requirements ensure that we maintain the biological integrity, diversity, and environmental health of the Refuge System for the benefit of present and future generations of Americans.

We annually review hunting and sport fishing programs to determine whether to include additional stations or whether individual station regulations governing existing programs need modifications. Changing environmental conditions, State and Federal regulations, and other factors affecting fish and wildlife populations and habitat may warrant modifications to station-specific regulations to ensure the continued compatibility of hunting and sport fishing programs and to ensure that these programs will not materially interfere with or detract from the fulfillment of station purposes or the Refuge System's mission.

Provisions governing hunting and sport fishing on refuges are in title 50 of the CFR at part 32 (50 CFR part 32), and on hatcheries at part 71 (50 CFR part 71). We regulate hunting and sport fishing to:

- Ensure compatibility with refuge and hatchery purpose(s);
- Properly manage fish and wildlife resource(s);
- Protect other values;
- Ensure visitor safety; and
- Provide opportunities for fish- and wildlife-dependent recreation.

On many stations where we decide to allow hunting and sport fishing, our general policy of adopting regulations identical to State hunting and sport fishing regulations is adequate to meet these objectives. On other stations, we must supplement State regulations with more-restrictive Federal regulations to ensure that we meet our management responsibilities, as outlined under Statutory Authority, below. We issue station-specific hunting and sport fishing regulations when we open national wildlife refuges and fish hatcheries to migratory game bird hunting, upland game hunting, big game hunting, or sport fishing. These regulations may list the wildlife species that you may hunt or fish; seasons; bag or creel (container for carrying fish)

limits; methods of hunting or sport fishing; descriptions of areas open to hunting or sport fishing; and other provisions as appropriate.

#### **Statutory Authority**

The Administration Act, as amended by the National Wildlife Refuge System Improvement Act of 1997 (Improvement Act; Pub. L. 105–57), governs the administration and public use of refuges, and the Refuge Recreation Act of 1962 (Recreation Act; 16 U.S.C. 460k–460k–4) governs the administration and public use of refuges and hatcheries.

Amendments enacted by the Improvement Act were built upon the Administration Act in a manner that provides an “organic act” for the Refuge System, similar to organic acts that exist for other public Federal lands. The Improvement Act serves to ensure that we effectively manage the Refuge System as a national network of lands, waters, and interests for the protection and conservation of our Nation's wildlife resources. The Administration Act states first and foremost that we focus our Refuge System mission on conservation of fish, wildlife, and plant resources and their habitats. The Improvement Act requires the Secretary, before allowing a new use of a refuge, or before expanding, renewing, or extending an existing use of a refuge, to determine that the use is compatible with the purpose for which the refuge was established and the mission of the Refuge System. The Improvement Act established as the policy of the United States that wildlife-dependent recreation, when compatible, is a legitimate and appropriate public use of the Refuge System, through which the American public can develop an appreciation for fish and wildlife. The Improvement Act established six wildlife-dependent recreational uses as the priority general public uses of the Refuge System. These uses are hunting, fishing, wildlife observation and photography, and environmental education and interpretation.

The Recreation Act authorizes the Secretary to administer areas within the Refuge System and Hatchery System for public recreation as an appropriate incidental or secondary use only to the extent that doing so is practicable and not inconsistent with the primary purpose(s) for which Congress and the Service established the areas. The Recreation Act requires that any recreational use of refuge or hatchery lands be compatible with the primary purpose(s) for which we established the refuge and not inconsistent with other previously authorized operations.

The Administration Act and Recreation Act also authorize the Secretary to issue regulations to carry out the purposes of the Acts and regulate uses.

We develop specific management plans for each refuge prior to opening it to hunting or sport fishing. In many cases, we develop station-specific regulations to ensure the compatibility of the programs with the purpose(s) for which we established the refuge or hatchery and the Refuge and Hatchery System mission. We ensure initial compliance with the Administration Act and the Recreation Act for hunting and sport fishing on newly acquired land through an interim determination of compatibility made at or near the time of acquisition. These regulations ensure that we make the determinations required by these acts prior to adding refuges or hatcheries to the lists of areas open to hunting and sport fishing in 50 CFR part 32 or 71, respectively. We ensure continued compliance by the development of comprehensive conservation plans and step-down management plans, and by annual review of hunting and sport fishing programs and regulations.

#### **Proposed Amendments to Existing Regulations**

##### *Revisions and Additions to Hunting and Fishing Opportunities on NWRs Stations*

This document proposes to codify in the CFR all the Service's hunting and/or sport fishing regulations that we would revise or add since the last time we amended these regulations (89 FR 88147; November 7, 2024) and that are applicable at Refuge System units previously opened to hunting and/or sport fishing. We propose this to better inform the general public of the regulations at each station, to increase understanding and compliance with these regulations, and to make enforcement of these regulations more efficient. The Service has strived to align with State hunting and fishing regulations; for example, modifications in 2019 removed or simplified thousands of regulations to reduce the regulatory burden on the public (84 FR 47641; September 10, 2019). The Service is committed to continuing to align with State regulations with respect to the use of ammunition and/or fishing tackle in future amendments. In addition to finding these regulations in 50 CFR parts 32 and 71, visitors to our stations may find them reiterated in literature distributed by each station or posted on signs.

**Key:**

N = New station opened for the first time.

O = Opening (New species and/or new activity on a station previously open to other activities).

E = Expansion (Station is already open to the activity; the proposed rule would add new lands/waters, modify areas open to hunting or fishing, extend season dates, add a targeted hunt, modify season dates, modify hunting hours, etc.).

PC = Partial closing (A portion of the acres and/or subset of the species are being closed to hunting).

\* We consider the changes at Grasslands WMA to be formal openings, rather than opening hunting for the first time. This is because these formal openings reflect existing hunts on Grasslands WMA that were opened and administered under the hunt plan for San Luis NWR, an adjacent station within the same complex. These formal openings will result in a new opportunity by expanding snipe hunting to additional acres, but the openings are largely an administrative change intended to provide greater clarity to the hunting public. This is why, for Grasslands WMA's migratory bird and upland game hunting, we use the designation 'O' rather than 'N' in this table.

The changes for the 2025–2026 hunting/fishing season noted in the table above are each based on a complete administrative record which, among other detailed documentation, also includes a hunt plan, a compatibility determination (for refuges), and the appropriate National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) analysis, all of which were the subject of a public review and comment process. These documents are available upon request.

Through these openings and expansions, we are proposing to open or expand hunting or fishing on 87,626 acres within the National Wildlife Refuge System and the National Fish Hatchery System.

**Refuge Name Change**

On March 4, 2025, Executive Order (E.O.) 14229 renamed the Anahuac NWR to honor Jocelyn Nungaray. We are proposing a revision for the Jocelyn Nungaray National Wildlife Refuge that reflects the name change.

**Fish Advisory**

For health reasons, anglers should review and follow State-issued consumption advisories before enjoying recreational sport fishing opportunities on Service-managed waters. You can find information about current fish-consumption advisories on the internet

at <https://www.epa.gov/choose-fish-and-shellfish-wisely>.

**Request for Comments**

You may submit comments and materials on these proposed revisions and additions to the CFR by one of the methods listed in **ADDRESSES**. We will not accept comments sent by email or fax or to an address not listed in **ADDRESSES**. We will not consider hand-delivered comments that we do not receive, or mailed comments that are not postmarked, by the date specified in **DATES**.

We will post your entire comment on <https://www.regulations.gov>. Before including personal identifying information in your comment, you should be aware that we may make your entire comment—including your personal identifying information—publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. We will post all hardcopy comments on <https://www.regulations.gov>.

**Required Determinations***Clarity of the Proposed Rule*

We are required by E.O.s 12866 and 12988 and by the Presidential memorandum of June 1, 1998, to write

all rules in plain language. This means that each rule we publish must:

- (a) Be logically organized;
- (b) Use the active voice to address readers directly;
- (c) Use clear language rather than jargon;
- (d) Be divided into short sections and sentences; and
- (e) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise our proposed revisions and additions to the CFR, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

*Regulatory Planning and Review—E.O.s 12866 and 13563*

E.O. 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the OMB will review all significant rules. OIRA has determined that these proposed revisions and additions to the CFR collectively are not significant.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the Nation's regulatory system to promote predictability, to

reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 13563 directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed these proposed revisions and additions to the CFR in a manner consistent with these requirements.

*Regulatory Flexibility Act (5 U.S.C. 601 et seq.)*

Under the Regulatory Flexibility Act (RFA; 5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA; title II of Pub. L. 104–121,

March 29, 1996), whenever a Federal agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Thus, for a regulatory flexibility analysis to be required, impacts must exceed a threshold for “significant impact” and a threshold for a “substantial number of small entities.” See 5 U.S.C. 605(b). SBREFA amended the RFA to require Federal agencies to provide a statement of the factual basis for certifying that a rule will not have a significant economic impact on a substantial number of small entities. We certify

that, if adopted as proposed, this proposed rule would not have a significant economic impact on a substantial number of small entities. The following discussion explains our rationale.

The proposed revisions and additions to the CFR would open or expand hunting or fishing on 17 stations. As a result, visitor use for wildlife-dependent recreation on these stations will change. If the stations establishing new programs were a pure addition to the current supply of those activities, it would mean an estimated maximum increase of 189 user days (one person per day participating in a recreational opportunity; see table 2). Because the participation trend is flat in these activities, this increase in supply will most likely be offset by other sites losing participants. Therefore, this is likely to be a substitute site for the activity and not necessarily an increase in participation rates for the activity.

To the extent visitors spend time and money in the area of the station that they would not have spent there anyway, they contribute new income to the regional economy and benefit local businesses. Due to the unavailability of site-specific expenditure data, we use the national estimates from the 2022 National Survey of Fishing, Hunting, and Wildlife Associated Recreation to identify expenditures for food and lodging, transportation, and other incidental expenses. Using the average expenditures for these categories with the maximum expected additional participation of the Refuge System

yields approximately \$6,000 in recreation-related expenditures (see table 2, above). By having ripple effects throughout the economy, these direct expenditures are only part of the economic impact of these recreational activities. Using a national impact multiplier for hunting activities (2.4) derived from the report “Hunting in America: An Economic Force for Conservation” and for fishing activities (2.3) derived from the report “Sportfishing in America” yields a total maximum economic impact of approximately \$14,000 (2024 dollars) (Southwick Associates, Inc., 2024).

Since we know that most of the fishing and hunting occurs within 100 miles of a participant’s residence, it is unlikely that most of this spending will be “new” money coming into a local economy; therefore, this spending will be offset with a decrease in some other sector of the local economy. The net gain to the local economies will be no more than \$14,000 and likely less. Since 80 percent of the participants travel less than 100 miles to engage in hunting and fishing activities, their spending patterns will not add new money into the local economy, and, therefore, the

real impact will be on the order of about \$3,000 annually.

Small businesses within the retail trade industry (such as hotels, gas stations, taxidermy shops, bait-and-tackle shops, and similar businesses) may be affected by some increased or decreased station visitation. A large percentage of these retail trade

establishments in the local communities around NWRs qualify as small businesses (see table 3, below). We expect that the incremental recreational changes will be scattered, and so we do not expect that the rule will have a significant economic effect on a substantial number of small entities in any region or nationally. As noted

previously, we expect at most \$14,000 to be spent in total in the stations' local economies. The maximum increase will be less than one-tenth of one percent for local retail trade spending (see table 3, below). Table 3 does not include entries for those stations for which we project no changes in recreation opportunities in 2025–2026; see table 2, above.

<sup>1</sup> U.S. Census Bureau.

With the small change in overall spending anticipated from this proposed rule, it is unlikely that a substantial number of small entities will have more than a small impact from the spending change near the affected stations. Therefore, we certify that this rule, as proposed, will not have a significant economic effect on a substantial number of small entities as defined under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). A regulatory flexibility analysis is not required. Accordingly, a small entity compliance guide is not required.

#### Congressional Review Act

The proposed revisions and additions to the CFR, collectively, are not a major rule under 5 U.S.C. 804(2), the Congressional Review Act. We anticipate no significant employment or small business effects. Collectively, the proposed revisions and additions to the CFR:

a. Would not have an annual effect on the economy of \$100 million or more. The minimal impact would be scattered across the country and would most likely not be significant in any local area.

b. Would not cause a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. The proposed opportunities would have only a slight effect on the costs of hunting opportunities for Americans. If the substitute sites are farther from the participants' residences, then an increase in travel costs would occur. The Service does not have information to quantify this change in travel cost but assumes that, since most people travel less than 100 miles to hunt, the increased travel cost would be small. We do not expect the proposed hunting opportunities to affect the supply or demand for hunting opportunities in the United States, and, therefore, it should not affect prices for hunting equipment and supplies, or the retailers that sell equipment.

c. Would not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. The proposed additions and revisions to existing opportunities represent only a

small proportion of recreational spending at NWRs. Therefore, if adopted, the proposed additions and revisions to the CFR would have no measurable economic effect on the wildlife-dependent industry, which has annual sales of equipment and travel expenditures of \$72 billion nationwide.

#### Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*)

Since the proposed revisions and additions to the CFR would apply to public use of federally owned and managed refuges, it would not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than \$100 million per year. The proposed revisions and additions to the CFR would not have a significant or unique effect on State, local, or Tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

#### Takings—E.O. 12630

In accordance with E.O. 12630, the proposed revisions and additions to the

CFR would not have significant takings implications. The proposed revisions and additions to the CFR would affect only visitors to NWRs and NFHS and would describe what they can do while they are on a Service station.

#### *Federalism—E.O. 13132*

As discussed under *Regulatory Planning and Review* and *Unfunded Mandates Reform Act*, above, the proposed revisions and additions to the CFR would not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement under E.O. 13132. In preparing these proposed revisions and additions to the CFR, we worked with State governments.

#### *Civil Justice Reform—E.O. 12988*

In accordance with E.O. 12988, the Department of the Interior has determined that these proposed revisions and additions to the CFR would not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of E.O. 12988 (Civil Justice Reform).

#### *Energy Supply, Distribution or Use—E.O. 13211*

On May 18, 2001, the President issued E.O. 13211 on regulations that significantly affect energy supply, distribution, or use. E.O. 13211 requires agencies to prepare statements of energy effects when undertaking certain actions. Because the proposed revisions and additions to the CFR would open or expand hunting at 17 NWRs and NFHS stations, the proposed revisions and additions to the CFR are not collectively a significant regulatory action under E.O. 12866, and we do not expect it to significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action, and no statement of energy effects is required.

#### *Consultation and Coordination With Indian Tribal Governments—E.O. 13175*

In accordance with E.O. 13175, we have evaluated possible effects on federally recognized Indian Tribes and have determined that there are no effects. We coordinate recreational use on NWRs and NFHS with Tribal governments having adjoining or overlapping jurisdiction before we propose the regulations.

#### *Unleashing Prosperity Through Deregulation—E.O. 14192*

The proposed revisions and additions to the CFR are not an E.O. 14192 (90 FR 9065; February 6, 2025) regulatory action because the proposed revisions

and additions to the CFR are not significant under E.O. 12866.

#### *Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)*

The proposal for revisions and additions to the CFR also contains existing and new collections of information. All information collections require approval by the OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB has reviewed and approved the information collection requirements associated with hunting and sport fishing activities across the National Wildlife Refuge System and National Fish Hatchery System and assigned the following OMB control numbers:

- 1018–0140, “Hunting and Sport Fishing Application Forms and Activity Reports for National Wildlife Refuges, 50 CFR 25.41, 25.43, 25.51, 26.32, 26.33, 27.42, 30.11, 31.15, 32.1 to 32.72” (Expires 09/30/2025),
- 1018–0102, “National Wildlife Refuge Special Use Permit Applications and Reports, 50 CFR 25, 26, 27, 29, 30, 31, 32, & 36” (Expires 05/31/2025, and in accordance with 5 CFR 1320.10, an agency may continue to conduct or sponsor this collection of information while the submission is pending at OMB),
- 1018–0135, “Electronic Federal Duck Stamp Program” (Expires 03/31/2026),
- 1018–0093, “Federal Fish and Wildlife Permit Applications and Reports—Management Authority; 50 CFR 13, 15, 16, 17, 18, 22, 23” (Expires 12/31/2026), and
- 1024–0252, “The Interagency Access Pass and Senior Pass Application Processes” (Expires 10/31/2027).

In accordance with the PRA and its implementing regulations at 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on our proposal to revise OMB Control Number 1018–0140. This input will help us assess the impact of our information collection requirements and minimize the public’s reporting burden. It will also help the public understand our information collection requirements and provide the requested data in the desired format.

As part of our continuing effort to reduce paperwork and respondent burdens, and in accordance with 5 CFR 1320.8(d)(1), we invite the public and other Federal agencies to comment on

any aspect of this proposed information collection, including:

- (1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;
- (2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to the proposed revisions and additions to the CFR are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The existing and new reporting and/or recordkeeping requirements identified below require approval by OMB:

**FORM 3–2358, “SPORT FISHING-SHRIMPING-CRABBING PERMIT APPLICATION”**—Form 3–2358 collects the following information:

- *Date of application:* We often have application deadlines, and this information helps staff determine the order in which we received the applications. It also ensures that the information is current.
- *State fishing license number:* We ask for this information to verify the applicant is legally licensed by the State (where required).
- *Permit type:* On sport fishing permits, we ask what type of activity (crabbing, shrimping, crabbing, frogging, etc.) is being applied for.
- *Applicant information:* We collect name, address, phone number(s), and email so we can contact the applicant/permittee either during the application process or after receiving a permit.
- *Signature and date:* To confirm that the applicant (and parent/guardian, if a

youth hunter) understands the terms and conditions of the permit.

**FORM 3-2405 “SELF-CLEARING CHECK-IN/OUT PERMIT”**—Form 3-2405 has three parts:

- **Self-Clearing Daily Check-in Permit.** Each user completes this portion of the form (date of visit, name, and telephone numbers) and deposits it in the permit box prior to engaging in any activity on the refuge.

- **Self-Clearing Daily Visitor Registration Permit.** Each user must complete the front side of the form (date, name, city, State, zip code, and purpose of visit) and carry this portion while on the refuge. At the completion of the visit, each user must complete the reverse side of the form (number of hours on refuge, harvest information (species and number), harvest method, angler information (species and number), and wildlife sighted (e.g., black bear and hog)) and deposit it in the permit box.

- **Self-Clearing Daily Vehicle Permit.** The driver and each user traveling in the vehicle must complete this part and display in clear view in the vehicle while on the refuge.

**Form 3-2405 collects:**

- **Information on the visitor (name, address, and contact information).** We use this information to identify the visitor or driver/passenger of a vehicle while on the refuge. This is extremely valuable information should visitors become lost or injured. Law enforcement officers can easily check vehicles for these cards in order to determine a starting point for the search or to contact family members in the event of an abandoned vehicle. Having this information readily available is critical in a search and rescue situation.

- **Purpose of visit (hunting, sport fishing, wildlife observation, wildlife photography, auto touring, birding, hiking, boating/canoeing, visitor center, special event, environmental education class, volunteering, other recreation).** This information is critical in determining public use participation in wildlife management programs. This not only allows the refuge to manage its hunt and other visitor use programs, but also to increase and/or improve facilities for non-consumptive uses that are becoming more popular on refuges. Data collected will also help managers better allocate staff and resources to serve the public as well as develop annual performance measures.

- **Total number of hunt days on the refuge (at the conclusion of their hunting activities).** Refuge management will use this information to monitor and evaluate hunt quality and resource impacts.

- **Success of harvest by hunters/ anglers (number and type of harvest/ caught).** This information is critical to wildlife management programs on refuges. Each refuge will customize the form by listing game species and incidental species available on the refuge, hunting methods allowed, and data needed for certain species (e.g., for deer, whether it's a buck or doe and the number of points; or for turkeys, the weight and beard and spur lengths).

- **Whether or not visitors observed black bear or hogs, for example.** This information will help managers develop annual performance measures for hog removal, and it provides information to help develop resource management planning.

- **Photograph of animal harvested (specific refuges only).** This requirement documents the sex of animal prior to the hunter being eligible to harvest the opposite sex (where allowed).

- **Date of visit and/or area visited.**

- **Comments.** We encourage visitors to comment on their experience.

**FORM 3-2439, “HUNTING APPLICATION/PERMIT”**—Form 3-2439 collects the following information:

- **Lottery application:** Refuges who administer hunting via a lottery system use Form 3-2439 as the lottery application. If the applicant is successful, the completed Form 3-2439 also serves as their permit application, avoiding a duplication of burden on the public filling out two separate forms.

- **Date of application:** We often have application deadlines, and this information helps staff determine the order in which we received the applications. It also ensures that the information is current.

- **Methods:** Some refuges hold multiple types of hunts, i.e., archery, shotgun, primitive weapons, etc. We ask for this information to identify which opportunity(ies) a hunter is applying for.

- **Species permit type:** Some refuges allow only certain species, such as moose, elk, or bighorn sheep, to be hunted. We ask hunters to identify which species hunt they are applying for.

- **Applicant information:** We collect name, address, phone number(s), and email so we can contact the applicant/permittee either during the application process, when the applicant is successful in a lottery drawing, or after receiving a permit.

- **Party members:** Some refuges allow the permit applicant to include additional hunters in their group. We collect the names of all additional hunters, when allowed by the refuge.

- **Parent/Guardian contact information:** We collect name, relationship, address, phone number(s), and email for a parent/guardian of youth hunters. We ask for this information in the event of an emergency.

- **Date:** We ask hunters for their preferences for hunt dates.

- **Hunt/Blind location:** We ask hunters for their preferences for hunt units, areas, or blinds.

- **Special hunts:** Some refuges hold special hunts for youth, hunters who are disabled, or other underserved populations. We ask hunters to identify if they are applying for these special hunts. For youth hunts, we ask for the age of the hunter at the time of the hunt.

- **Signature and date:** To confirm that the applicant (and parent/guardian, if a youth hunter) understands the terms and conditions of the permit.

- **Disabled hunts:** Some refuges provide an option to allow mobility-impaired applicants to reserve specific hunting blinds upon providing proof of disability. The refuge will not retain the proof of disability. The documentation will be shredded upon approval of the blind reservation.

**FORM 3-2542, “HUNTER HARVEST REPORT”**—Form 3-2542 collects the following information:

- **State-issued hunter identification (ID)/license number.** (Note: Refuges/hatcheries who rely on the State agency to issue hunting permits are not required to collect the permittee's personal identifying information (PII) on the harvest form. Those refuges/hatcheries may opt to collect only the State ID number assigned to the hunter in order to match harvest data with their issued permit. Refuges/hatcheries will collect either hunter PII or State-issued ID number, but not both.)

- **Species observed—Data will be used by refuge/hatchery staff to document the presence of rare or unusual species.**

- **Permit number/type—Data will be used to link the harvest report to the issued permit.**

- **Hunt tag number—Data will be used to link the harvest report to the species-specific hunt tag.**

- **Number of youth (younger than age 18) in party—Data will be used to better understand volume of youth hunting on a refuge/hatchery. Specific hunter names are not collected, just total number of youths in hunting party.**

- **Harvested by—Data will be used to determine ratio of adults to youth hunters. Specific hunter names are not collected.**

- **Species observed—Data will be used by a refuge/hatchery to determine the presence of any unusual species**

(e.g., endangered or threatened species, or invasive species).

#### **LABELING/MARKING**

**REQUIREMENTS**—As a condition of the permit, some refuges require permittees to label hunting and/or sport fishing gear used on the refuge. This equipment may include items such as the following: tree stands, blinds, or game cameras; hunting dogs (collars); flagging/trail markers; boats; and/or sport fishing equipment such as jugs, trotlines, and crawfish or crab traps. Refuges require the owner label their equipment with their last name, the State-issued hunting/fishing license number, and/or hunting/fishing permit number. Refuges may also require equipment for youth hunters include “YOUTH” on the label. This minimal information is necessary in the event the refuge needs to contact the owner.

**REQUIRED NOTIFICATIONS**—On occasion, hunters may find their game has landed outside of established hunting boundaries. In this situation, hunters must notify an authorized refuge employee to obtain consent to retrieve the game from an area closed to hunting or entry only upon specific consent. Certain refuges also require hunters to notify the refuge manager when hunting specific species (e.g., black bear, bobcat, or eastern coyote) with trailing dogs. Refuges encompassing privately owned lands, referred to as “easement overlay refuges,” may also require the hunter obtain written or oral permission from the landowner prior to accessing the land.

**PROPOSED REVISIONS**—With this submission, we are proposing three revisions to OMB Control No. 1018–0140 as described below:

1. *Updates to Form 3–2439, “Hunting Application/Permit”*—With the submission, we propose to incorporate the fields listed below from the Mentored Hunt Application (no form number assigned), which is currently approved under OMB Control No. 1018–0191, Lenape NWR Complex Mentored Hunt Application, into the currently approved Form 3–2439, “Hunting Application/Permit.” The Service requires all mentored hunt participants to sign the Service’s “USFWS Release and Waiver of Liability,” as well as a Form 3–2260, “Agreement for Use of Likeness in Audio/Visual Products,” when they are on the Refuge.

- Emergency contact (name and phone number);
- Applicant hunting history, such as:
- Whether applicant has completed a basic hunter education course;
- Whether applicant has purchased a hunting license, and if yes, when;

- Previous hunting experience;
- Previous participation in a mentored hunt program;
- Interest in hunting;
- Family history of hunting;
- Whether applicant owns equipment and if yes, type of equipment; and
- Medical conditions/allergies for program staff to be aware of in the event of an emergency.

The information collected via the application will be used by the Service and partners to determine eligibility for the program the hunter applies to participate in. Upon OMB approval of this revision at the final rule stage, we will discontinue OMB Control No. 1018–0191.

2. *Update Regarding Terms of Clearance*—With this submission, we are also providing OMB with an update regarding the Terms of Clearance they assigned to Control Number 1018–0140 on 09/16/2022 regarding the implementation of a single, FedRAMP-certified platform for hunt applications. The Service obtained FedRAMP authorization for the RecAccess platform. We are also working with a contractor to improve services on the *Recreation.gov* platform. However, based on customer experience analysis, a mandate to consolidate to one platform would adversely affect the customer experience at some sites that offer free opportunities to veterans and youth. It would also create a problem for some refuges that charge for issued permits, not for each permit application. The use of two platforms allows the Service to account for the variability in fee models and to continue to offer free and low-cost options to our customers, as the Service primarily uses permits to limit use, not to generate fees.

3. *New IC for Web-Based Permit Application Platforms*—With this submission, we are also splitting the previously approved burden associated with hunting applications into separate information collections for hardcopy permit applications and those that are web-based permit applications on the *Recreation.gov* and *RecAccess.com* platforms. The online systems do not collect any information above what is currently approved to be collected via the hardcopy version of Form 3–2439.

Copies of the draft forms are available to the public by submitting a request to the Service Information Collection Clearance Officer using one of the methods identified above in **ADDRESSES**. *Title of Collection:* Hunting and Fishing Application Forms and Activity Reports for National Wildlife Refuges and National Fish Hatcheries (50 CFR parts 32 and 71).

*OMB Control Number:* 1018–0140.

*Form Numbers:* 3–2348, 3–2405, 3–2439, and 3–2542.

*Type of Review:* Revision of a currently approved collection.

*Respondents/Affected Public:* Individuals/households.

*Total Estimated Number of Annual Respondents:* 1,632,055.

*Total Estimated Number of Annual Responses:* 1,632,055.

*Estimated Completion Time per Response:* Varies from 5 minutes to 30 minutes, depending on activity.

*Total Estimated Number of Annual Burden Hours:* 265,117.

*Respondent’s Obligation:* Required to obtain or retain a benefit.

*Frequency of Collection:* On occasion for applications; annually or on occasion for reports.

*Total Estimated Annual Non-Hour Burden Cost:* \$87,365 (primarily associated with application fees at some refuges hunting and/or sport fishing).

Send your written comments and suggestions on this information collection by the date indicated in **DATES** to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: PRB/PERMA (JAO), 5275 Leesburg Pike, Falls Church, VA 22041–3803 (mail); or by email to *Info\_Coll@fws.gov*. Please reference OMB Control Number 1018–0140 in the subject line of your comments.

*Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.)*

We comply with section 7 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), when developing comprehensive conservation plans and step-down management plans—which includes hunting and/or fishing plans—for public use of refuges and hatcheries, and prior to implementing any new or revised public recreation program on a station as identified in 50 CFR 26.32. We complied with section 7 for each of the stations affected by this proposed rulemaking.

*National Environmental Policy Act (42 U.S.C. 4321 et seq.)*

We analyzed this proposed rule in accordance with the criteria of the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4332(C)) and 516 Departmental Manual (DM) 8.

A categorical exclusion from NEPA documentation applies to publication of proposed amendments to station-specific hunting and fishing regulations because they are technical and procedural in nature, and the environmental effects are too broad, speculative, or conjectural to lend

themselves to meaningful analysis (516 DM 8). Concerning the actions that are the subject of these proposed additions and revisions, we have complied with NEPA at the project level when developing each proposal. This is consistent with the Department of the Interior instructions for compliance with NEPA where actions are covered sufficiently by an earlier environmental document.

Prior to the addition of a refuge or hatchery to the list of areas open to hunting and fishing in 50 CFR parts 32 and 71, we develop hunting and fishing plans for the affected stations. We incorporate these proposed station hunting and fishing activities in the station comprehensive conservation plan and/or other step-down management plans, pursuant to our refuge planning guidance in 602 Fish and Wildlife Service Manual (FW) 1, 3, and 4. We prepare these comprehensive conservation plans and step-down plans in compliance with section 102(2)(C) of NEPA and the Department of Interior's NEPA regulations at 43 CFR part 46. We invite the affected public to participate in the review, development, and implementation of these plans. Copies of all plans and NEPA compliance are available from the stations at the addresses provided below.
