

the Federal Government as security for Agency loans. The Agency's policy on sales of capital assets requires that the sale meet several requirements including the following: (1) the selling price shall be greater than or equal to the fair market value; and (2) the sale shall not jeopardize the repayment of the Agency's loan.

The selling of assets reduces the security and increases the risk to the government. RUS Form 369 allows the borrower to seek agency permission to sell some of its assets. The form collects detailed information regarding the proposed sales of a portion of the borrower's systems. RUS electric utility borrowers complete this form to request RUS approval in order to sell capital assets when the fair market value exceeds 10 percent of the borrower's net utility plant.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's (OMB) regulation (5 CFR part 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104-13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies the following information collection that RUS is submitting to OMB as extension to an existing collection with Agency adjustment.

Title: Wholesale Contracts for the Purchase and Sale of Electric Power.
OMB Control Number: 0572-0089.
Expiration Date of Approval: November 30, 2022.

Type of Request: Extension of a currently approved information collection.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 6 hours per response.

Respondents: Small business or other for-profit; not-for-profit organizations.

Estimated Number of Respondents: 10.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 60 hours.

Abstract: Most RUS financed electric systems are cooperatives and are organized in a two-tiered structure. Retail customers are members of the distribution system that provides electricity to their homes and business. Distribution cooperatives, in turn, are members of power supply cooperatives, also known as generation and transmission cooperatives (G&T's) that generate or purchase power and transmit the power to the distribution systems.

For a distribution system, a lien on the borrower's assets generally represents adequate security. However, since most G&T revenues flow from its distribution members, RUS requires, as a condition of a loan or loan guarantee to a G&T the long-term requirements wholesale power contract (WPC) to purchase their power from the G&T at rates that cover all the G&T's expenses, including debt service and margins. RUS considers Form 444 as an example for the G&T's to utilize as either their WPC or create their own WPC if it has all the same information as the form. The WPC is specialized based on the combined requirements of the G&T and its members. The WPC is used by RUS G&T borrowers to enter into agreement with their distribution members for purchase of power from the G&T. The WPC is prepared and executed by the G&T and each member and by RUS and the information allows RUS to determine credit quality and credit worthiness to determine repayment ability for loans and loan guarantees.
