SUPPLEMENTARY INFORMATION: Under part 235 of title 49 Code of Federal

Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by letters dated March 17, 2025, and May 9, 2025, NS petitioned FRA seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA-2025-0044.

Specifically, NS requests to discontinue the traffic control system (TCS) on the AS Line within Asheville Yard, from milepost (MP) 138.18 to MP 141.33 of the Blue Ridge Division. NS additionally proposes to remove 10 circuited hand-throw switches/derails and to convert part of the track to NS Rule 93 operation and part to non-signaled main track within yard limits. In support of its application, NS states that “train operations in this area no longer warrant” the need for TCS, and the modification “will aid in the restoration efforts following storm-related damages,” which will “ensur[e] a safe operating environment as repairs are completed” to missing or non-repairable equipment. NS adds that the change will “maintain a conservative, risk averse operating environment.”

SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR) and pursuant to 49 CFR 238.21, this document provides the public notice that by letter dated March

14, 2025, the Peninsula Corridor Joint Powers Board (Caltrain) petitioned FRA for a special approval of an alternative standard to 49 CFR 238.309(b)(4), Periodic brake equipment maintenance. FRA assigned the petition Docket Number FRA–2025–0043.

Caltrain requests approval of an alternative standard to 49 CFR 238.309(b)(4), which requires brake equipment on diesel multiple unit (DMU) and multiple unit (MU) locomotives to be periodically cleaned, repaired, and tested, among other maintenance, every 736 days. Instead, Caltrain proposes to increase the duration of the maintenance interval to a minimum of 1,840 days (with a goal of 3,680 days) for its Stadler KISS electric multiple units (EMUs), which are equipped with air dryers. As justification of its request, Caltrain states that the braking system for its EMUs has been designed for a maximum operating speed of 110 miles per hour and provides for “fail-safe friction brake effort.” Caltrain also proposes that a test committee is formed, with representatives from FRA as well as the EMU and brake manufacturers, to “oversee all aspects of the waiver process” and “support the test and inspection activities.”
