

establishment's name; the site's address and telephone and facsimile numbers; the name and telephone number of the management official; the type of business; a description and the specific location of the hazards, including the approximate number of workers exposed or threatened by the hazards; and whether or not the worker/worker representative informed another government agency about the hazards (and the name of the agency if so informed).

Additional information on the hardcopy version of the form concerns the complainant including: whether or not the complainant wants OSHA to reveal their name to the employer; whether the complainant is a worker or a worker representative, or for information provided orally, a member of a Federal safety and health committee or another party (with space to specify the party); the complainant's name, telephone number, and address; and the complainant's signature attesting that they believe a violation of an OSHA standard exists at the named establishment; and the date of the signature. A worker representative must also provide the name of the organization they represent and their title.

The information contained in the online version of the OSHA-7 Form is similar to the hardcopy version. However, the online version requests the complainant's e-mail address, and does not ask for the site's facsimile number or the complainant's signature and signature date.

The Agency uses the information collected on the OSHA-7 Form to determine whether reasonable grounds exist to conduct an inspection of the workplace. The description of the hazards, including the number of exposed workers, allows the Agency to assess the severity of the hazards and the need to expedite the inspection. The completed form also provides the employer with notice of the complaint and may serve as the basis for obtaining a search warrant if the employer denies the Agency access to the workplace.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on workers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements relating to the OSHA-7 Form. The Agency is requesting an increase in burden hours from 12,775 to 13,414 (a total increase of 639 burden hours). The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

SUPPLEMENTARY INFORMATION:

I. Background

The OSH Act and 29 CFR part 1904 prescribe that certain employers maintain records of job-related injuries and illnesses. The injury and illness records are intended to have multiple purposes. One purpose is to provide data needed by OSHA to carry out enforcement and intervention activities to provide workers a safe and healthy work environment. The data are also needed by the Bureau of Labor Statistics to report on the number and rate of occupational injuries and illnesses in the country. The data also provides information to employers and employees of the kinds of injuries and illnesses occurring in the workplace and their related hazards. Increased employer awareness should result in the identification and voluntary correction of hazardous workplace conditions. Likewise, employees who are provided information on injuries and illnesses will be more likely to follow safe work practices and report workplace hazards. This would generally raise the overall level of safety and health in the workplace. OSHA currently has approval from the Office of Management and Budget (OMB) for information collection requirements contained in 29

CFR part 1904. That approval will expire on [February 29, 2011] unless OSHA applies for an extension of the OMB approval. This notice initiates the process for OSHA to request an extension of the current OMB approval. This notice also solicits public comment on OSHA's existing paperwork burden estimates from those interested parties and seeks public responses to several questions related to the development of OSHA's estimates. Interested parties are requested to review OSHA's estimates, which are based upon the most current data available, and to comment on their accuracy or appropriateness in today's workplace situation.

II. Current Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard 29 CFR part 1904, Recording and Reporting Occupational Injuries and Illnesses.

The Agency is requesting to reduce its current burden hour estimate associated with this Standard from 3,072,978 to 2,967,237 hours for a total reduction of 105,741 hours. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: 29 CFR part 1904, Recording and Reporting Occupational Injuries and Illnesses (1218-0176).

OMB Number: 1218-0176.

Affected Public: Business or other for-profits; farms; not-for-profit institutions; State and local government.

Cite/Reference/Form/etc.: 29 CFR part 1904; OSHA Form 300; OSHA Form 300A; OSHA Form 301.

Number of Respondents: 1,585,374.

Frequency: On occasion.

Average Time per Response: 2 hours to complete based on the information required.

Estimated Total Burden Hours: 2,967,237.

Estimated Cost (Operation and Maintenance): \$136,753,120.

SUPPLEMENTARY INFORMATION:

I. Background

The Vietnam Era Veterans' Readjustment Assistance Act of 1974 ("VEVRAA"), 38 U.S.C. 4212(d), requires Federal contractors and subcontractors subject to the Act's affirmative action provisions in 38 U.S.C. 4212(a) to track and report annually to the Secretary of Labor the number of employees in their workforces, by job category and hiring location, who belong to the specified categories of covered veterans. VETS maintains two sets of regulations to implement the reporting requirements under VEVRAA, and uses two different forms for providing the required information on the employment of covered veterans.

The regulations set forth in 41 CFR part 61-250 require contractors that have a Government contract of \$25,000 or more entered into before December 1, 2003, to use the Federal Contractor Veterans' Employment Report VETS-100 ("VETS-100 Report") form for reporting information on the number of covered veterans in their workforces.

The regulations set forth in 41 CFR part 61-300 implement amendments to the reporting requirements under VEVRAA that were made by the Jobs for Veterans Act (JVA) (Pub. L. 107-288) enacted in 2002. The JVA amended VEVRAA by: (1) Increased from \$25,000 to \$100,000, the dollar amount of the contract that subjects a Federal contractor to the requirement to report on veterans' employment; and (2) changed the categories of covered veterans under VEVRAA, and thus the categories of veterans that contractors are required to track and report on annually.

The regulations in 41 CFR part 61-300 require contractors with a Government contract entered into or modified on or after December 1, 2003, in the amount of \$100,000 or more to use the Federal Contractor Veterans' Employment Report VETS-100A for reporting information on their employment of covered veterans under VEVRAA.

Both the VETS-100 and VETS-100A Reports are currently approved under OMB No. 1293-0005.
