

capital. For FBOs, a percentage of the FBO's capital measure, known as the U.S. capital equivalency, is used to calculate the FBO's net debit cap.

Currently, an FBO with U.S. branches or agencies may voluntarily file the FR 2225 to provide the Federal Reserve with its capital measure. Because an FBO that files the FR 2225 may be able to use its total capital in determining its U.S. capital equivalency measure, which is then used to calculate its net debit cap, an FBO seeking to maximize its daylight overdraft capacity may find it advantageous to file the FR 2225. An FBO that does not file FR 2225 may use an alternative capital measure based on its nonrelated liabilities.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Submission for OMB Review; Comment Request; National Evaluation of the Clinical and Translational Science Awards (CTSA) Initiative

SUMMARY: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Center for Research Resources, the National Institutes of Health has submitted to the Office of Management and Budget (OMB) a request to review and approve the information collection listed below. This proposed information collection was previously published in the **Federal Register** on October 12, 2010, pages 62543-62544, and allowed 60-days for public comment. No comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Proposed Collection:

Title: The National Evaluation of the Clinical and Translational Science Awards (CTSA) Initiative.

Type of Information Collection Request: New.

Need and Use of Information Collection:

The CTSA Initiative is directed at transforming the way biomedical research is conducted nationwide by reducing the time it takes

for basic science or laboratory discoveries to become treatments for patients, and for those treatments in turn to be incorporated and disseminated throughout community practice. The primary purpose of this data collection is to provide information about the process and early outcomes associated with 46 awardees participating in the first four cohorts of CTSA awards, in order to fulfill the congressional expectations for external program evaluation. NIH will use the results to understand the extent to which the CTSA Initiative is bringing about transformational changes in clinical and translational science among academic medical centers and their research partners, increasing the efficiency of the research process, and enhancing the capacity of the field to conduct clinical and translational research. All information collected will be used to provide analytical and policy support to NCRR, assisting NIH in making decisions about current CTSA programming, future funding, and other initiatives to improve clinical and translational science. It may also provide information for NIH's Government Performance and Results Act (GPRA) report.

Frequency of Response: Biennial.

Affected Public: Individuals.

Type of Respondents: Scientific researchers. The annual reporting burden is as follows:

Estimated Number of Respondents: 3,563;

Estimated Number of Responses per Respondent: 1;

Average Burden Hours Per Response: 0.13;

Estimated Total Annual Burden Hours Requested: 451.5. The annualized cost to respondents is estimated at \$14,056. There are no capital or start-up costs, and no maintenance or service cost components to report.

Respondent type	Estimated number of respondents	Estimated number of hours per respondent type	Frequency of response	Estimated total annual burden hours requested
Users survey	500	.25	.5	62.5
Nonusers survey	500	.08	.5	20.0
Trainees/scholars survey	1,213	.33	.5	200.0
