

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Project No. 11563–057]****Northern California Power Agency; Notice of Availability of Final Environmental Assessment**

August 31, 2010.

In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Commission has reviewed an application filed by the Northern California Power Agency (licensee) on May 26, 2010, and supplemented on July 11 and August 9, 2010, requesting Commission approval to temporarily amend the license for the Upper Utica Project, FERC No. 11563. The licensee seeks Commission approval to partially draw down Lake Alpine and deviate from the minimum reservoir surface elevation and minimum water volume requirements of the project license in order to facilitate repairs to the low-level outlet works. The Environmental Assessment (EA) analyzes the environmental impacts of the proposed activities and concludes that approval of the application, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment. The project is located on Silver Creek and the North Fork Stanislaus River, in Tuolumne and Alpine Counties, California.

The EA was written by staff in the Office of Energy Projects, Federal Energy Regulatory Commission. A copy of the EA is attached to a Commission order titled "Order Approving Temporary License Amendment," issued August 31, 2010, and is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at 1–866–208–3372, or for TTY, (202) 502–8659.

Kimberly D. Bose,
Secretary.

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Project No. 1267–089]****Greenwood County, SC; Notice of Availability of Environmental Assessment**

September 1, 2010.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Office of Energy Projects has prepared an environmental assessment (EA) for an application filed by Greenwood County, South Carolina (licensee) on January 26, 2010, requesting Commission approval to amend article 407 of its project license for the Buzzards Roost Hydroelectric Project (FERC No. 1267). The licensee requests permission to revise the schedule for management of lake levels (rule curve) to maintain the lake at the summer level until November 1 in order to facilitate late-season recreation. The licensee also proposes to maintain the lake at its annual low from January 15 until February 1 of each year in order to provide a period for adjacent landowners to work on permitted encroachments. The licensee states that it would vary from article 407 to perform necessary maintenances, safely manage flood flows, during operating emergencies, and to meet minimum flow requirements under article 408. The project is located on the Saluda River in Greenwood, Laurens, and Newberry Counties, South Carolina. The project does not occupy any federal lands.

The EA evaluates the environmental impacts that would result from approving the licensee's proposal to amend article 407 of the project license. The EA finds that approval of the application would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is attached to a Commission Order titled "Order Amending License," issued August 31, 2010, and is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number (P–1267) excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-

free at 1–866–208–3372, or for TTY, (202) 502–8659.

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Project No. 13–023]****Green Island Power Authority; Notice of Availability of Draft Environmental Assessment**

August 31, 2010.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a new license for the 6.0-megawatt Green Island Hydroelectric Project, located on the Hudson River, in Albany County, New York, and has prepared a Draft Environmental Assessment (DEA). In the DEA, Commission staff analyzes the potential environmental effects of relicensing the project and conclude that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the DEA is on file with the Commission and is available for public inspection. The DEA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access documents. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at 1–866–208–3676, or for TTY, (202) 502–8659.

You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via e-mail of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The remaining hydro licensing procedural schedule is as follows:

Milestone	Target date
Comments of the DEA Modified terms and conditions.	September 30, 2010. November 29, 2010.
