#### **ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:**

All HUD employees have undergone background investigations. HUD buildings are guarded and monitored by security personnel, cameras, ID checks, and other physical security measures. Access is restricted to authorized personnel or contractors whose responsibilities require access. System users must take the mandatory security awareness training annually as mandated by the Federal Information Security Management Act (FISMA). Users must also sign a Rules of Behavior form certifying that they agree to comply with the requirements before they are granted access to the system. HUDCAPS resides on the P207 IBM Mainframe general support system, which is at NASA's Stennis Space Center. The physical security controls for P207 IBM Mainframe is the responsibility of OCIO. OCIO handles the backups and encryption of backups on the P207 IBM Mainframe. OCIO is also responsible for the mainframe/LAN-based security controls (e.g., VPN, encryption of data in transit, IDS). All users authenticate to the HUD LAN with PIV cards before they can access HUDCAPS. OCFO limits access to records that contain PII data on a need to know basis, user recertification is performed, audit logs are reviewed, security assessments are performed, and background checks are performed prior to granting access. Not all employees and contractors have access to the vendor table that includes the PII.

Updates to HUDCAPS vendor data is limited to those with specific roles.
