

2. What regulations should we reconsider as we look to achieve some of the policy objectives outlined in Executive Order 14212, “Establishing the President’s Make America Healthy Again Commission,” to focus on reversing chronic disease?

3. For more general deregulatory consideration under E.O. 14192, are there additional HHS regulations and/or guidance that:

- * Are confusing or unnecessarily complicated;

- * Require an excessive number of reports or unreasonable record keeping, or information that is not needed or used effectively;

- * Impose requirements on the wrong individual or group;

- * Carry excessive penalties;

- * Are conflicting (examples include but are not limited to conflicts between HHS and State regulations, public and private sectors);

- * Impede access to or delivery of care or services;

- * Impede efforts to innovate

- * Are obsolete; and/or

- * Otherwise interfere with the public or private sector’s ability to address chronic health conditions or otherwise promote the health and wellbeing of Americans?

Should they be modified or repealed? What would be the impact of this change, especially the costs and savings?

4. What alternative approaches could be taken to achieve or accomplish the same goal with a lesser burden? For example, are there less burdensome approaches that are used by other entities such as State governments or private companies that could be adopted by HHS to achieve its goal with less burdensome requirements? What

would be the impact on costs and savings?

5. Are there HHS regulations, guidance, or reporting requirements that are rooted in outdated technology? Can new technologies be leveraged to allow for rescinding or updating these policies? What are the cost implications?

6. Are there HHS regulations, guidance, or reporting requirements that are inconsistent with Executive Orders 14151, 14154, 14168, and 14213 or others issued by the President? Should they be modified or rescinded to make them consistent?
