The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class D airspace at Griffiss AFB, Rome, NY. The protection of an activated Control Tower makes this action necessary. That airspace would extend from the surface to and including 3,200 feet MSL within a 4.5 mile radius of the Griffiss Airfield, Rome, NY, and within 2 miles each side of bearing 135°/315° from a point at Lat 43°14.03' N, Long 75°24.42' W, extending from the 4.5 mile radius zone, to a point 6 miles NW and 6 miles SE of the airport. The class D airspace area would be effective during the specific dates and times established in advance by a notice to airmen. The effective date and time would thereafter be continuously published in the Airport/Facility Directory. Class D airspace designations for airspace areas extending upward from the surface to and including 3,200 feet MSL are published in Paragraph 5000 of FAA Order 7400.9P, dated September 1, 2006, and effective September 16, 2006, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation, as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic

impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
