

DEPARTMENT OF COMMERCE**Census Bureau****Proposed Information Collection; Comment Request; Current Population Survey (CPS) Basic Demographic Items**

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: To ensure consideration, written comments must be submitted on or before February 24, 2014.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Karen Woods, U.S. Census Bureau, 7H110F, Washington, DC 20133–8400 at (301) 763–3806 (or via the internet at Karen.g.wms.woods@census.gov).

SUPPLEMENTARY INFORMATION:**I. Abstract**

The Census Bureau plans to request clearance from the Office of Management and Budget (OMB) for the collection of basic demographic information on the Current Population Survey (CPS) beginning in June 2014. The current clearance expires June 30, 2014.

The CPS has been the source of official government statistics on employment and unemployment for over 50 years. The Bureau of Labor Statistics (BLS) and the Census Bureau jointly sponsor the basic monthly survey. The Census Bureau also prepares and conducts all the field work. At the OMB's request, the Census Bureau and the BLS divide the clearance request in order to reflect the joint sponsorship and funding of the CPS program. The BLS submits a separate clearance request for the portion of the CPS that collects labor

force information for the civilian noninstitutional population. Some of the information within that portion includes employment status, number of hours worked, job search activities, earnings, duration of unemployment, and the industry and occupation classification of the job held the previous week. The justification that follows is in support of the demographic data.

The demographic information collected in the CPS provides a unique set of data on selected characteristics for the civilian noninstitutional population. Some of the demographic information we collect are age, marital status, gender, Armed Forces status, education, race, origin, and family income. We use these data in conjunction with other data, particularly the monthly labor force data, as well as periodic supplement data. We also use these data independently for internal analytic research and for evaluation of other surveys. In addition, we use these data as a control to produce accurate estimates of other personal characteristics.

II. Method of Collection

The CPS basic demographic information is collected from individual households by both personal visit and telephone interviews each month. All interviews are conducted using computer-assisted interviewing. Households in the CPS are in sample for four consecutive months, and for the same four months the following year. This is called a 4–8–4 rotation pattern; households are in sample for four months, in a resting period for eight months, and then in sample again for four months.

III. Data

OMB Control Number: 0607–0049.

Form Number: There are no forms.

We conduct all interviews on computers.

Type of Review: Regular submission.

Affected Public: Households.

Estimated Number of Respondents: 59,000 per month.

Estimated Time per Response: 1.6396 minutes.

Estimated Total Annual Burden Hours: 19,347.

Estimated Total Annual Cost: There is no cost to the respondents other than their time.

Respondents Obligation: Voluntary.

Legal Authority: Title 13, U.S.C., Section 182, and Title 29, U.S.C., Sections 1–9.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information

is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: December 18, 2013.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE**Census Bureau****Proposed Information Collection; Comment Request; 2014 Census Site Test**

AGENCY: U.S. Census Bureau.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: To ensure consideration, written comments must be submitted on or before February 24, 2014.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Erin Love, Census Bureau, HQ–3H468E, Washington, DC 20233; (301) 763–2034 (or via email at erin.s.love@census.gov).

SUPPLEMENTARY INFORMATION:**I. Abstract**

During the years preceding the 2020 Census, the Census Bureau will pursue its commitment to reduce the costs of conducting a decennial census, while striving to maintain the level of quality it achieved for previous ones. A primary decennial census cost driver is the collection of data from members of the public for which the Census Bureau received no reply via initially offered response options. Increasing the number of people who take advantage of self-response options and improving our methods for enumerating people who do not initially respond can contribute to a less costly census with high-quality results, reducing the need for more costly enumerator-administered options.

The 2014 Census Site Test will allow the Census Bureau to, on a small scale, employ a variety of new methods and advanced technologies that are under consideration for the 2020 Census. To improve self-response, the Census Bureau plans to test new contact and notification strategies such as allowing respondents to pre-register their email address, cell phone number/text, mailing address, and physical location, and provide a preference for a contact strategy of either email or text. Furthermore, participants will have the option of responding to the test via multiple response modes including the Internet, paper questionnaires, and telephone interviews. In addition, the 2014 Census Site Test provides an opportunity for the Census Bureau to test potential enhancements to its automated processing of responses lacking a pre-assigned Census identification (ID) number. To optimize the self-response testing, there will be a communications and promotional campaign designed to increase awareness and encourage participation by potential respondents.

Even though self-response is encouraged, there will be households that do not respond and therefore there is a need to test strategies to most effectively and efficiently collect information for those households. The 2014 Census Site Test will examine reducing the total number of contacts made to a household during the Nonresponse Follow-Up (NRFU) operation as well as adapting the number and type of contacts made to a household based on information we have about that household. As well, this test will employ various uses of administrative records, most notably the removal of cases through the use of administrative records data either before or during the field work with the goal

to reduce NRFU costs and increase interviewer efficiency. This test of NRFU operations will be accomplished by utilizing an automated field data collection instrument. Additionally, the Census Bureau will experiment with employee-owned commercially available devices on which a custom developed data collection application can be provided, commonly referred to as Bring Your Own Device (BYOD).

II. Method of Collection

The Census Bureau will conduct this test in Washington, DC and Montgomery County, MD. This geographic site test will include 192,500 Housing Units to be contacted for the census. This component includes an initial self-response phase that is followed by a NRFU phase for no more than 50,000 non-responding housing units. The households in NRFU are those who have failed to self-respond by a certain deadline. A Census Bureau employee may visit or phone these households and will attempt to collect their questionnaire data.

For the self-response phase, the Census Bureau will randomly assign sampled housing units to one of eight different contact and enumeration strategies. Each strategy aims to increase the use of self-response enumeration in a decennial census. Most sampled housing units will initially receive a pre-notification containing instructions about how to respond to the test online. Some households will receive a notice that allows respondents to pre-register for the Census and to notify the Census Bureau of their communication preference such as email or text/cell phone. The telephone assistance option will be available to all households. Respondents who become aware of the test can respond by going to the Internet site or contacting the Telephone Questionnaire Assistance line. For those participants who have not responded within an allotted time period, the Census Bureau will attempt to contact them additional times, which will include reminders by email or a final reminder along with a paper questionnaire by mail.

If a household does not respond by a certain date, it will be included in the universe for the NRFU portion of the test. There are three major NRFU treatments being tested in the 2014 Census Site Test. First, the *Tailored Contact Strategies* portion will research and test ways of reducing the cost of in-person follow-up for cases sent to the field by finding ways to streamline operations to promote efficiencies (such as reducing the number of contact attempts), while striving to maintain

quality. In addition, the project will use 2010 Census field procedures to use as a control group from which to compare results.

Second, the *Adaptive Design Strategies* portion will test a method of managing data collection by dynamically adapting contact attempt strategies on a *per case basis* using paradata and business rules to inform real-time management decisions. Principles associated with adaptive design such as using alternative modes of contact and using paradata to model the likelihood for a household to respond to repeated contact attempts will be applied to the NRFU workload in an attempt to lower field costs.

Third, the *Administrative Records* portion of the NRFU operations will reduce NRFU workloads at various stages of fieldwork. Some areas (in both the *Tailored Contact* and *Adaptive Design* portions described above) will have their NRFU workload reduced because administrative records information will be utilized to enumerate households that have been determined to be vacant or occupied and therefore do not require fieldwork. In other areas, administrative records information will be utilized to only enumerate unoccupied units that do not require field work. Administrative records will also be used to enumerate households for which a number of unsuccessful contact attempts have been made in the field in lieu of additional contact attempts. Overall, using administrative records information to remove non-responding cases from the field workload may reduce costs associated with NRFU operations.

The geographic area contains two strata, based on relative levels of response. The strata include distinct geographic areas that will correspond with different contact strategies. This mix of levels of response will allow the Census Bureau to gather cost data associated with mileage and hours spent traveling to housing units and interviewing respondents during NRFU operations. In addition, Time and Motion studies will be conducted.

For the 2014 Census Site Test, the Census Bureau will test the use of an automated enumeration device in field operations. The enumeration device is a new development effort with the goal of replacing paper based data collection methods historically used in decennial operations such as Nonresponse Follow-Up (NRFU). The test will help evaluate:

- The effectiveness of conducting a field operation with the use of consumer grade devices (e.g. iPhones and iPads).
- The effectiveness of replacing traditional paper maps with Google

Maps for locating housing units for enumeration activities.

In addition, for follow-on to the 2014 Census Site Test, the Census Bureau will experiment with using employee owned commercially owned smartphones to conduct the NRFU. The use of employee owned equipment/ services is commonly referred to as Bring Your Own Device or BYOD. A sample of 250 households will be contacted at the end of the field operation using this methodology. The objectives of this component of the test are to:

- Design and develop software solutions, deployment, and support processes that run on commercially available employee owned mobile devices (i.e., iPhone).
- Deploy and support secure software solutions that can be installed on commercially available employee owned mobile devices.
- Conduct interviews of respondents using employee owned mobile devices (i.e., iPhone).
- Capture lessons learned.

III. Data

OMB Control Number: None.

Form Number: Paper questionnaires: DC-1A and DC-1B; electronic questionnaires with numbers as yet to be determined.

Type of Review: Regular submission.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 192,500.

Estimated Time Per Response: 10 minutes per response.

Estimated Total Annual Burden Hours: 32,083.

Estimated Total Annual Cost: Respondents who are contacted by cell phone and/or text message may incur charges depending on their plan with their service provider. The Census Bureau estimates that the total cost to respondents will be no more than \$840,000. There are no other costs to respondents other than their time to participate in this data collection.

Respondents Obligation: Mandatory.

Legal Authority: Title 13 U.S.C. 141 and 193.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection;

they also will become a matter of public record.

Dated: December 18, 2013.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility To Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, Department of Commerce

ACTION: Notice and Opportunity for Public Comment

Pursuant to Section 251 of the Trade Act 1974, as amended (19 U.S.C. 2341 et seq.), the Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below.

Accordingly, EDA has initiated investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each of these firms contributed importantly to the total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT ASSISTANCE [12/06/2013 through 12/18/2013]

Firm name	Firm address	Date accepted for investigation	Product(s)
GKI, Inc	6204 Factory Road, Crystal Lake, IL 60014.	12/13/2013	The firm manufactures metal cutting tools for the stamped metal part manufacturing industry.
Metaltech Products, Inc	16055 Highway E, Lebanon, MO 65536.	12/17/2013	The firm manufactures custom metal fabrications—including radiator covers, generator covers/enclosures, weather boxes, back-up power supply -battery racks, and mobile feed troughs.
Decker Manufacturing, Inc	312 Blondeau St, Keokuk, IA 52632.	12/17/2013	The firm manufactures metal curry combs, grooming brushes, hog catchers & rings, and farrier supplies.
Novatek, Inc	2185 Tracy Hall Parkway, Provo, UT 84606.	12/17/2013	The firm is a machine shop manufacturer specializing in asphalt and concrete milling products.
Mountainside Medical Colorado, LLC.	6165 Lookout Road, Boulder CO 80301.	12/17/2013	The firm manufactures electromechanical products and sub-assemblies for the medical industry.
Trent Spendrup Corporation (dba Spendrup Fan Co.).	2768 C 1/2 Road, Grand Junction, CO 81501.	12/17/2013	The firm manufactures custom industrial fans.

Any party having a substantial interest in these proceedings may request a public hearing on the matter. A written request for a hearing must be submitted to the Trade Adjustment

Assistance for Firms Division, Room 71030, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no

later than ten (10) calendar days following publication of this notice.

Please follow the requirements set forth in EDA's regulations at 13 CFR 315.9 for procedures to request a public
