Summary	This regulation establishes an exemption from the requirement of a tolerance for residues of carbon black (CAS Reg. No. 1333-86-4) under 40 CFR 180.920 when used as an inert ingredient (colorant) in pesticide formulations applied to seeds used to grow agricultural and horticultural crops. Condition Met	#3 (Articles about 40 CFR Division 'Resource Conservation Recovery Act (RCRA)')
Summary	The state of Colorado has applied to EPA for final authorization of changes to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). EPA proposes to grant final authorization to the hazardous waste program changes submitted by the state of Colorado. In the

	<p>"Rules and Regulations" section of this Federal Register, EPA is authorizing the changes in an immediate final rule. EPA did not propose the rule prior to issuing the immediate final rule because the Agency believes this action is not controversial and does not expect comments that oppose it. We have explained the reasons for this authorization in the preamble to the immediate final rule. Unless we receive written comments that oppose this authorization during the comment period, the immediate final rule will become effective on the date it establishes, and EPA will not take further action on this proposal. If the Agency receives comments that oppose this action, EPA will publish a document in the Federal Register withdrawing this rule before it takes effect. EPA will then address public comments in a later final rule based on this proposal. Any parties interested in commenting on this action must do so at this time. EPA may not provide further opportunity for comment.</p>

The exemption is effective from February 1, 2010 through January 31, 2012. NHTSA published a notice of receipt of the application on September 16, 2008 and afforded an opportunity for public comment.
